FULLSTACK DEVELOPER

Experienced full-stack developer with 6+ years of hands-on expertise in designing, developing, and optimizing scalable web applications across diverse industries and company sizes. I combine a strong foundation in UX/UI design with solid backend engineering to create seamless, high-performance systems. I collaborate effectively across teams to deliver solutions that enhance efficiency and business impact.

Experience

Senior Full-stack Developer
July 2025 - Now
Chat3D | 3D modeling software
France

- Migrated the front-end to a more modern architecture, improving application stability and streamlining maintenance.
- Developed a 3D generation interface integrated with the company's AI model enabling real-time visualization and enriched user experience.
- Upgraded code quality by fixing 160 backend tests and 250 frontend issues, increasing code quality and development efficiency.
- Redesigned the landing and pricing pages based on Figma mock-ups boosting product showcase and brand visibility during trade shows.

Full-stack Developer
Jan 2022 - Jan 2025
Monizze SA | Fintech in employee benefits
Belgium

- Modernized a legacy back-office system, resolving technical incidents and implementing new features to enhance system stability and maintainability.
- Built a new SaaS onboarding platform for mobility vouchers, integrating an external AI chatbot to guide users through the updated HR legal framework.
- Independently developed a reusable component library aligned with the company's design system, ensuring UI consistency across multiple internal projects.
- Advised and guided the front-end team, defining code quality standards, optimizing performance and accessibility.

Senior Java Developer
Jan 2021 - Dec 2021
Capgemini | Consultancy for BNP Paribas
Belgium

- Delivered a SaaS onboarding platform for premium clients (with budget over €100K), ensuring secure and effective account creation.
- Implemented a three-layer Java 11 (Maven) architecture, improving scalability and data reliability.
- Took full ownership of the React TypeScript front-end, creating reusable components and tested data flows.
- Collaborated with cross-functional teams to define priorities and deliver high-quality features in an agile setup.
